COMMON METRIC AND INCH HARDWARE CONVERSIONS

Allowances have been made in punched and drilled holes to allow interchangeability of metric and inch dimension hardware in fastening and mounting applications. However, this interchangeability does not apply to tapped holes or using metric dimension nuts on inch cap screws, studs and bolts. Likewise, inch dimension nuts cannot be used on metric cap screws, studs or bolts.

The following is a listing of common sizes for substitution.

Some 2600 and 3600 gasoline engines 1975/- have been produced with a crankshaft having a 4.2 stroke insted of the standard 3.8 stroke. When the pistons listed in Fig. 6D1 are used the pistons will extend approximately 1/4" above the top of the block. When this situation occurs, use 65/5-68 5000 gasoline pistons shown in PA-9125, Fig. 6D1.
